MASCHINENMESSER GMBH

Wir über uns

About us

Sobre nosotros

Ihr kompetenter Partner!  
**Innovativ. Professionell.**

- 1982** *Gründung der Firma ERHOPHAL*, die seitdem mit der Produktion von Hobelmessern sowie Sondermessern weltweit tätig ist. Im Laufe der Jahre verlagerten wir unsere Produktion immer weiter in Richtung Hobel- und Kappscherenmesser.
- 2000** entschieden wir uns, die Produktpalette Hobelmesser weiter auszubauen.
- 2005** brachten wir das **patentierete Multi-Profil-System** auf den Markt. Kurze Zeit später machte sich die Firma ERHOPHAL mit der **Einführung der Marke HPS®** einen Namen und konnte große Erfolge mit diesem weltweit einzigartigen Produkt verbuchen.
- 2007** entwickelten wir die nächste Innovation, das **Verkleben von Hartmetall auf Stahl**. Dieses Verfahren gewinnt im Zuge der steigenden Rohstoffkosten an immer größerer Bedeutung.
- 2010** stellten wir unsere Produktpalette vollständig auf das Plan- und Profilhobel um. Damit verbunden nahmen wir die **Produktion von Hartmetall Systemhobelmessern** auf.
- 2012** bezogen wir unser **neues Verwaltungsgebäude**. Die nun zur Verfügung stehenden Räumlichkeiten ermöglichen uns, Fertigung, Lager, Versand und Logistik optimal für Sie zu strukturieren. Wir erzielen somit die, für unsere Kunden, heute so wichtige hohe Lieferbereitschaft.

*Mit uns sind Sie durch Innovation und Qualität den ständig wachsenden Anforderungen immer einen Schritt voraus.*

- 1982** *Foundation of the company ERHOPHAL* that has since the production of special steel knives and blades around the world. Over the years, we shifted our production continues in the direction of blades.
- 2000** we decided to extend the product range planer blades on.
- 2005** we introduced the **patented multi-profile system** on the market. A short time later, the company ERHOPHAL made with the **introduction of HPS®** brand name and was achieved great success with this unique product.
- 2007** we developed the next innovation, the **bonding of carbide to steel**. This method gains in the wake of rising raw material costs on increasing importance.
- 2010** we introduced our product range in order to complete the plan and profile planing. Linked to this, we started **production of carbide system planer knives**.
- 2012** we moved into our **new office building**. The now available premises allow us to structure manufacturing, warehouse, distribution and logistics to optimal for you. We obtain thus, for our customers, now so important high delivery.

*With us you are through Innovation and Quality the ever increasing demands one step ahead.*

- 1982** *Fundación de la empresa que tiene ERHOPHAL* ya que la producción de cuchillos y cuchillas de acero especial de todo el mundo. A través de los años, hemos cambiado nuestra producción continúa en la dirección de las cuchillas.
- 2000** *se decidió extender las cuchillas cepilladoras gama de productos en.*
- 2005** se introdujo el sistema **patentado de multi-perfil del sistema** en el mercado. Poco tiempo después, la compañía hizo ERHOPHAL con la **introducción de HPS®** marca y se logró un gran éxito con este producto único.
- 2007** se desarrolló el siguiente innovación, **la unión de carburo en el acero**. Este método obtiene a raíz de los crecientes costos de las materias primas cada vez más importancia.
- 2010** introdujimos nuestra gama de productos con el fin de completar el plan, cepillado y preparación de perfiles. En relación con esto, se inició **la producción de cuchillas de metal duro cepilladora del sistema**.
- 2012** nos mudamos a nuestro **nuevo edificio de oficinas**. Las instalaciones disponibles en la actualidad nos permiten estructurar la fabricación, almacenamiento, distribución y logística para óptima para usted. Se obtiene así, para nuestros clientes, hoy parto de alto tan importante.

*Con nosotros es a través de Innovación y Calidad las crecientes demandas un paso por delante.*

*Wir freuen uns auf Ihre Anforderungen*

*We look forward to your requirements*

*Esperamos con interés sus requisitos*

**ERHOPHAL**<sup>®</sup>  
MASCHINENMESSER GMBH

**Ihr kompetenter Partner!**  
**Innovativ. Professionell.**

HPS<sup>®</sup> Deutsch

### **Wirtschaftliche Holzbearbeitung mit Qualität aus „Made in Germany“**

Speziell für die Holzbearbeitung entwickelt

Standwege in Weichholz sind meist besser wie bei HSS

Standwege in Hartholz meist gleich wie HSS

Einfacheres Profilieren, Nachschärfen und Trennen

Warmfestigkeit des Materials bis über 520°C

Höhere Schlagfestigkeit als HSS

Höhere Zähigkeit und Bruchfestigkeit als HSS

Verarbeitung und Toleranzen in einzigartiger ERHOPHAL Qualität

HPS<sup>®</sup> – einmalig in der Welt

Stabiles und günstiges Preisniveau  
– unabhängig von HSS

Alle Messertypen in HPS<sup>®</sup> erhältlich

HPS<sup>®</sup> English

### **Economical woodworking with quality of „Made in Germany“**

Especially developed for woodworking

Lifetime in softwoods mostly better than HSS

Lifetime in hardwoods very similar than HSS

Easier profiling, regrinding and cutting than HSS

High temperature strength more than 520° C  
(968° F)

Higher impact strength than HSS

Higher toughness and increased breakage  
resistance than HSS

Manufacturing and tolerances in unique  
ERHOPHAL quality

HPS<sup>®</sup> worldwide unique

Steady and favourable price level  
– independent of HSS

All kind of knives available in HPS<sup>®</sup>

HPS® Español

## Trabajo de la madera económico con la calidad de la „Made in Germany“

Especialmente para el trabajo de la madera desarrolla

Caminos permanentes en madera blanda son mejores la mayoría de las veces como en HSS

Caminos permanentes en madera dura la mayoría de las veces inmediatamente como HSS

El perfilar más fácil, las postagudezas y Separar

Solidez caliente del material hasta 520°C

Solidez de golpe superior que HSS

Tenacidad superior y resistencia a la rotura que HSS

Empleo y tolerancias en más único ERHOPHAL Calidad

HPS® – excepcionalmente en el mundo

Nivel de precio estable y favorable – independientemente de HSS

Todos los tipos de cuchillo en HPS®

# Rückenverzahnte Blanketts

Corrugated back knives • Cuchillas corrugadas

Lieferbar in HSS, HPS<sup>®</sup> und Hartmetall bestückt, mit 60° oder 90° Verzahnung. Alle rückenverzahnten Blanketts werden auf Präzisionsschleifmaschinen mit Messsteuerung geschliffen und garantieren so absolute Maßhaltigkeit und genauen Passsitz in den Messerköpfen. Die Präzision mit der unsere rückenverzahnten Blanketts gefertigt werden gewährleistet eine hohe Gewichtsgenauigkeit und verhindert so unerwünschte Vibrationen beim Einsatz der Messer.

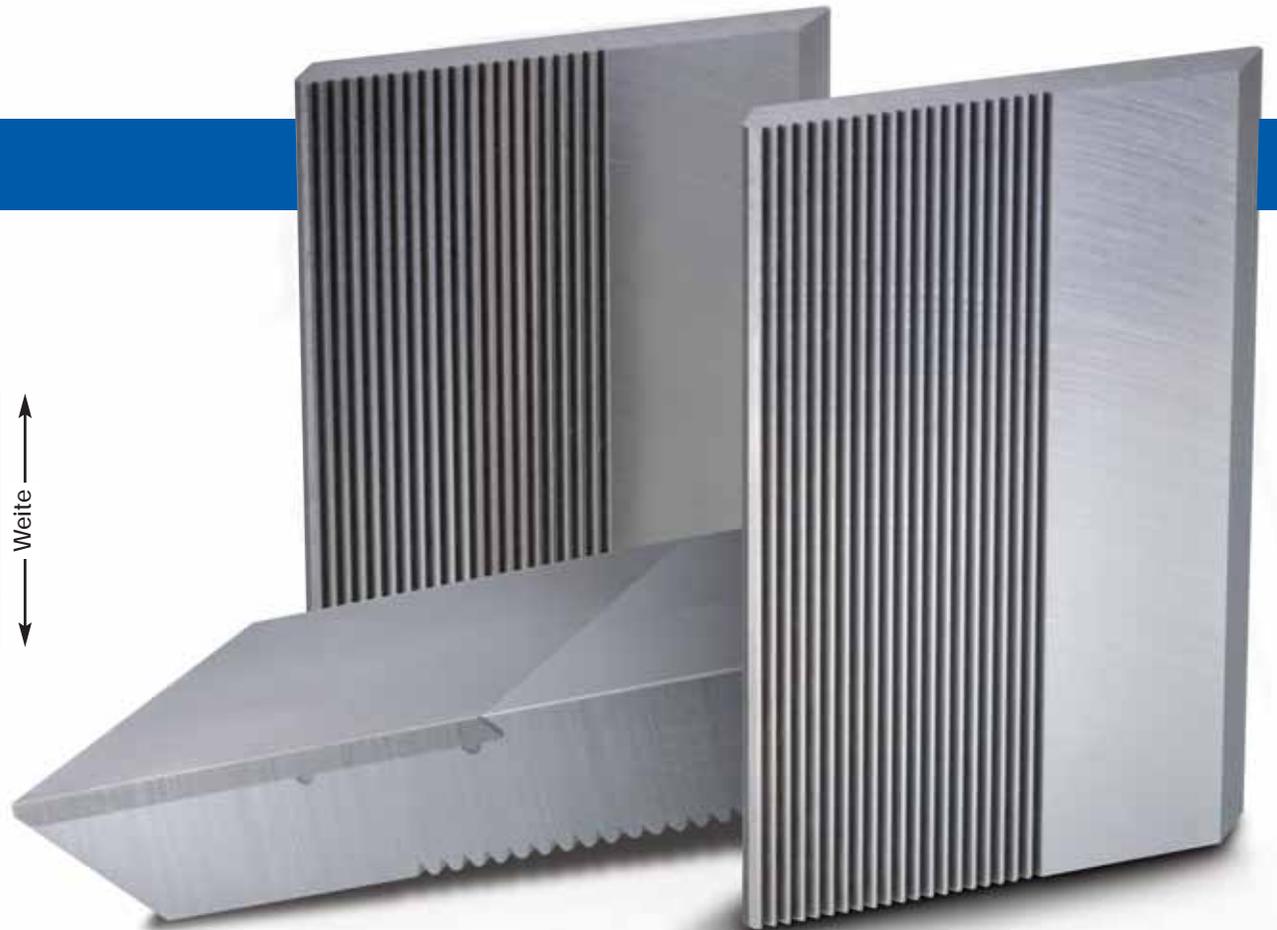

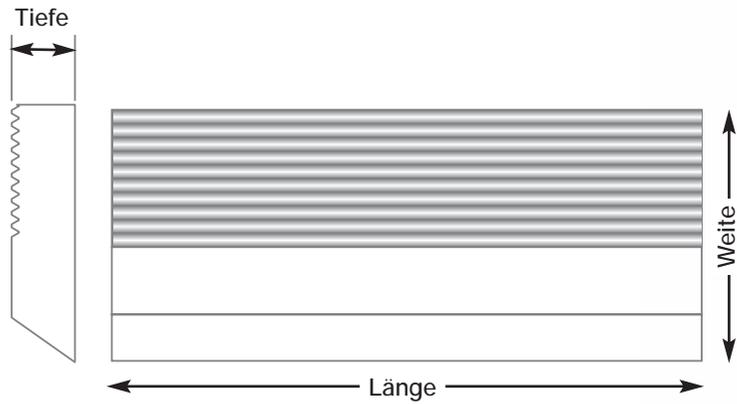

Available in HSS, HPS<sup>®</sup> and carbide tipped with 60° or 90° indentation. All corrugated back knives are ground on precision grinding machines with measurement control and therefore guarantee absolute dimensional accuracy and a precise snug fit in the knife milling head. The precision with which our corrugated back knives are produced guarantees a high level of weight accuracy and consequently prevents undesirable vibrations during use of the knife.

Suministrables en HSS, HPS<sup>®</sup> y equipadas con metal duro, con dentado de 60° o 90°. Todas las placas dentadas se mecanizan con máquinas de precisión con control de medición y garantizan un cumplimiento absoluto de las dimensiones así como un asentamiento preciso de los cabezales de las cuchillas. La precisión con la que se mecanizan nuestras placas dentadas garantiza una alta precisión del peso y, por ende, evita molestas vibraciones en el uso de las cuchillas.

# HSS, HPS<sup>®</sup>, TCT

**Inlay-Tiefen in 20, 25 und 35 mm möglich**

**Inlay depths possible in 20, 25 and 35 mm**

**Inlay posibles profundidades en mm 20, 25 y 35**

**2 mm Hartmetall 2 mm Carbide 2 mm Carburo**

- Getrenntes Schleifen von Hartmetall-Blankett und Stützplatte.
- Hochpräzise Verzahnung für perfekten Sitz der Blanketts.
- Einfacheres Profil-Schleifen durch gehärtete Stützplatten.
- Hohe Wirtschaftlichkeit durch mehrfach mögliches Nachschärfen.
- Geeignet zum Profilieren von Harthölzern und harten oder abrasiven Werkstoffen.

- Separate profiling job of carbide blank and backing plate.
- High precision corrugations for perfect fit of blanks.
- Multiple regrinding of blanks guarantees high efficiency.
- Easier profile grinding because of heat treated backing plates.
- SpeedPac is recommended for working on hard woods and hard or abrasive materials.

- Rectificado separado de carburo Blankett y la placa de respaldo.
- Corrugado de alta precisión para un ajuste perfecto del blankett.
- Afilado más fácil gracias al tratamiento térmico de la placa de respaldo.
- Alta eficiencia a través de múltiples posibles reafilados.
- Adecuado para el perfilado de maderas duras y materiales muy duros o abrasivos.

Lieferbar in HSS, HPS<sup>®</sup> und Hartmetall bestückt. Unsere Streifenhobelmesser werden auf Präzisionsschleifmaschinen mit Messsteuerung einsatzfertig geschliffen und abgezogen. Um eine hohe Standzeit der HSS und HPS<sup>®</sup> Messer zu gewährleisten werden diese in modernen Vakuumöfen gehärtet und angelassen. Die einsatzfertig abgezogene Schneide unserer Messer garantiert ein hervorragendes Hobelergebnis vom ersten Schnitt an. Für die Herstellung der Hartmetallbestückten Messer verwenden wir ausschließlich deutsches Qualitätshartmetall.

Available in HSS, HPS<sup>®</sup> and carbide tipped. Our thin planer knives are ground and sharpened ready for use on precision grinding machines with measurement control. In order to ensure a high tool life they are hardened and tempered in modern vacuum ovens. The ready for use cutting edge of our knives guarantee an outstanding smooth result. We only use German quality carbide for the production of the carbide tipped knives.

Pueden suministrarse en HSS, HPS<sup>®</sup> metal duro. Nuestras cuchillas finas para cepillar se mecanizan con máquinas de alta precisión y exactos sistemas de medición. Tras este proceso las cuchillas están listas para ser usadas y perfectamente pulidas. Para garantizar una larga duración de la vida útil de las cuchillas HSS y HPS<sup>®</sup> estas son endurecidas y revenidas en modernos hornos al vacío. Los pulidos filos de nuestros cuchillos garantizan un excelente cepillado desde el primer corte. Para la fabricación de cuchillas armadas con metal duro empleamos solamente. Metal duro alemán de excelente calidad.

HSS, HPS<sup>®</sup>, TCT

Lieferbar in HSS, HPS<sup>®</sup> und HW. Alle Messer werden auf modernsten CNC Tief-Schleifmaschinen präzisionsgeschliffen und garantieren optimalen Passsitz in den Messerwellen. Die HSS und HPS<sup>®</sup> Messer werden in Hochvakuumöfen durchgehend gehärtet und angelassen. Das durch dieses Verfahren erreichte feinkörnige Gefüge der Messer gewährleistet maximale Standzeiten und ein optimales Preis-Leistungsverhältnis.

Available in HSS, HPS<sup>®</sup> and HW. All knives are precision ground on CNC deep grinding machines and guarantee an optimal snug fit in the knife driving shaft. The HSS and HPS<sup>®</sup> knives are continuously hardened and tempered in the high vacuum oven. The fine particle structure which is achieved by this method guarantees maximal tool lifetime and an optimal price-performance ratio.

Pueden suministrarse en HSS, HPS<sup>®</sup> y HW. Todas las cuchillas se mecanizan con las más modernas máquinas CNC de mecanizado fino en profundidad y garantizan un asiento óptimo de los ejes de cuchilla. Las cuchillas HSS y HPS<sup>®</sup> se endurecen y revienen en hornos al vacío. La estructura de granos finos de las cuchillas obtenida gracias a este proceso garantiza una máxima duración de la vida útil y una relación óptima entre el precio y el rendimiento.

# Standard Wendeschneidplatten

Standard reversible knives • Cuchillas reversibles

Unsere Wendeplatten werden mit höchster Präzision und mit kleinsten Toleranzen geschliffen. Moderne Hartmetall Sorten und echtes „Made in Germany“ garantieren höchste Qualität.

Our reversible knives are ground with high precision and smallest tolerances. Modern carbide grades and any real "Made in Germany" guarantees highest quality.

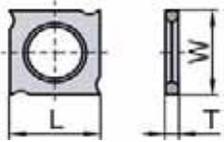

Nuestras cuchillas reversibles son afiladas con máxima precisión y con mínimas tolerancias. Utilizamos modernos tipos de metales duros y ofrecemos auténtico „Made in Germany“.

Die Bearbeitung moderner, abrasiver Holzfaser-, Verbund und Sonderwerkstoffe wie MDF, Multiplex, Corian etc. und der zunehmende Einsatz von CNC-Technik in der Holzbearbeitung stellen immer größere Anforderungen an das Schneidwerkzeug. Besonders im Bereich der Standard-Werkzeuge kann diesen Anforderungen mit den derzeit bekannten Systemen nicht ausreichend wirksam begegnet werden.

Aus diesem Grund wurde das hier vorgestellte MULTI-PROFIL-System entwickelt. Die Auswahl leistungsstarker Schneidwerkstoffe wie Hartmetall und HS-Stahl und die Kompatibilität mit den vorhandenen Aufnahmewerkzeugen bieten die wirtschaftliche Lösung heutiger Fertigungsaufgaben

The processing of modern, abrasive wood fibre, composite and special materials such as MDF, Multiplex, Corian, etc. and the increasing use of CNC technology in wood processing make ever increasing demands on the cutting tool. Especially in the area of standard tools, these demands cannot be met with adequate effectiveness by currently known systems.

For this reason, the MULTI-PROFIL system presented here has been developed. The selection of high-performance cutting materials such as Tungsten carbide and HS-steel and the compatibility with existing receiving tools offer the economic solution to today's manufacturing tasks.

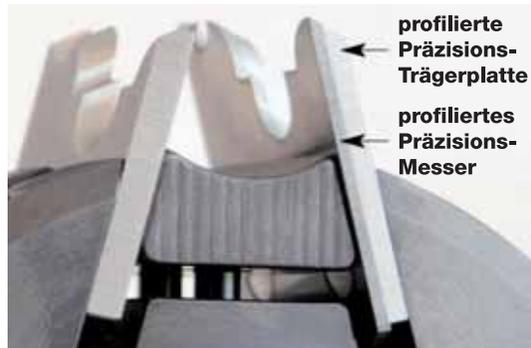

El mecanizado moderno, fibra de madera abrasiva, materiales compuestos y materiales especiales, tales como MDF, madera contrachapada, Corian, etc, y el uso creciente de la tecnología CNC para trabajar la madera crean exigencias cada vez mayores para las herramientas de corte. Especialmente en el área de las herramientas estándares no se pueden satisfacer estas exigencias de manera satisfactoria con los sistemas conocidos hasta ahora.

Por esta razón fue desarrollada la propuesta MULTI-PERFIL. La selección de materiales de corte de alto rendimiento, tales como carburo de tungsteno y acero de alta velocidad y la compatibilidad con las herramientas HW de alto rendimiento existentes ofrecen una opción económica de las tareas de producción de hoy en día.

Die neue UNI-Profilmesser Generation:

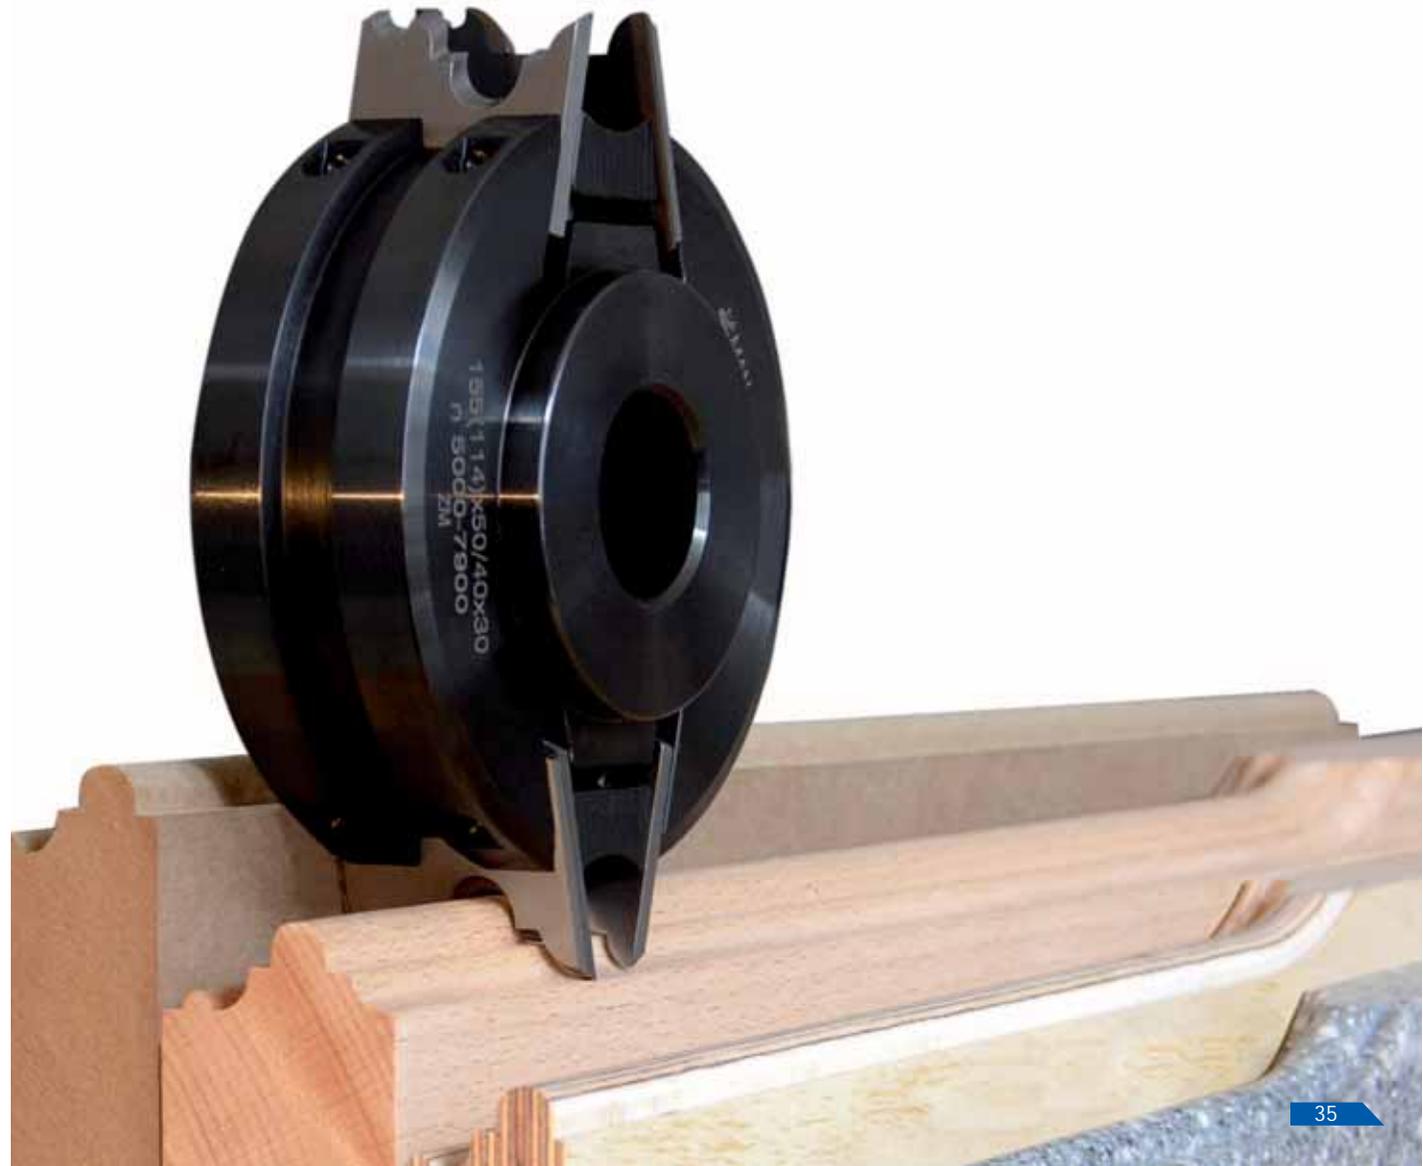

# Das Erhophal MULTI-PROFIL System

Das HW-Hochleistungs-Schneidwerkzeug für die hohen Anforderungen bei der Bearbeitung abrasiver Holzfaser- und Verbundwerkzeugstoffe wie z.B. MDF, Multiplex, Corian.

The TC high-performance cutting tool to satisfy the high demands of abrasive wood fibre and composite material (e.g. MDF, Multiplex, Corian) processing.

Las herramientas HW de alto rendimiento de corte para los altos requerimientos en el procesamiento de la fibra de madera y materiales compuestos abrasivos tales como herramienta MDF, contrachapado, corian.

## Das System:

- Durch die hochgenaue Fertigung auf modernsten CNC-Maschinen ist höchste Pass- und Profilgenauigkeit und ein präziser Sitz in allen gängigen Messerköpfen garantiert.
- Die in Hartmetall (HW) und HS-Qualität verfügbaren Schneidplatten können je nach Bearbeitungsfall ausgewählt werden und ermöglichen so eine hohe Flexibilität und Reduzierung Ihrer Kosten.
- Der Einsatz von HW-Messern garantiert Ihnen eine vielfach höhere Standzeit gegenüber bekannten SP- und HS-Qualitäten = optimiertes Preis-/Leistungsverhältnis.
- Es sind ca. 130 Standardprofile aus dem klassischen UNI-Profilprogramm verfügbar, die Ihnen in gewohnter Weise kurzfristig zur Verfügung stehen.
- Vorhandene Profilabweiser sind weiterhin verwendbar.
- Durch die hier gezeigte form- und kraftschlüssige Spannung des Systems im Kopf sind die maximal zulässigen Profiltiefen auch für Sonderprofile möglich.

- The high-precision manufacture on state-of-the-art CNC machines guarantees highest fitting and profile accuracy and a precise fit in all commonly used cutter heads.
- The cutting tips that are available in Tungsten carbide (TC) and HS-quality can be selected in accordance with the material to be processed and thus afford a high degree of flexibility while also reducing your costs.
- The use of TC-cutters guarantees a much longer service life compared to known SP and HS qualities = optimised price / performance ratio
- Approx. 130 standard profiles are available from the classic UNI profile range which are as usual available at short notice
- It is possible to continue using existing profile deflectors
- Thanks to the form- and force-locked system tension in the head, the maximum permissible profile depths can also be realised for special profiles.

- Gracias al acabado de alta precisión en modernas máquinas CNC garantizamos la exactitud del paso y del perfil y un ajuste preciso en todos los cabezales de los cuchillos.
- Las placas para cortar disponibles en metal duro HW y calidad HS pueden ser seleccionadas según cada caso de trabajado y permiten de este modo una gran flexibilidad y reducción de sus costes.
- El uso de cuchillas HW le garantiza vidas útiles mucho más duraderas que las conocidas calidades SP y HS = optimización del binomio calidad-precio.
- Disponemos de 130 perfiles estándares en nuestro programa de UNI-perfiles, que podemos poner a su disposición como habitualmente en un corto plazo.
- Es posible seguir utilizando el deflector de perfiles existente.
- Mediante las mostradas tensiones de forma y fricción del sistema en el cabezal son también posibles las profundidades máximas permitidas en los perfiles especiales.
